

EDWIN MAKOLO

Toronto, ON | 647-803-1720 | edwinmakolo5@gmail.com | [LinkedIn](#) | [GitHub](#)

A highly motivated **Software Engineering Technology, specializing in Artificial Intelligence** student with a strong foundation in **full-stack web development**, focusing on modern frontend programming with **React** and fundamental backend integration principles. Familiar with application configuration, build tools, package management, and environment setup, as well as a thorough understanding of how frontend applications interact with backend services.

Currently, advancing knowledge on AI systems design, AI ethics and algorithms & data structures.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, C#, SQL

Web Technologies: HTML, CSS, React, React Router

Development Tools: GitHub, Vs Code

Concepts: Frontend & Backend Development, Component-Based Design, Client-Side Routing, UI/Web Designer

EDUCATION

Software Engineering Technology (Co-op) - Artificial Intelligence Advanced Diploma

Sept. 2024 - Present

Centennial College, Toronto, ON

Key Courses: Web Application Development | Java Programming | Web Interface Design | C# Programming | Functions and Number Systems | Linux Operating Systems | AI System Design | Software Requirements Engineering

ACADEMIC PROJECTS

Personal Portfolio Website (React)

React | JavaScript | HTML | CSS | React | Router

- Created a multi-page portfolio utilizing React and modern JavaScript, with component-based architecture
- Implemented React Router for smooth page navigation without reloading
- Developed reusable components and used responsive styling for desktop and mobile layouts

Agile Ticketing & Workflow System (Full-Stack)

Node.js | Express | MongoDB | REST APIs | Postman | JWT | Jira | Agile

- Designed and developed a backend framework for user authentication, role-based access control & ticket management
- Used structured Postman collections to create RESTful API endpoints and validate functionality
- Jest was used for automated testing coverage of routes, validation, and authorization logic
- Used Jira to plan sprints, manage backlogs, and deliver iteratively

WORK EXPERIENCE

Poll Worker - Deputy Return Office | Elections Canada

April 2025

Toronto, ON

- Oversaw voting process to ensure fair, accurate and efficient election
- Distributed ballots and helped voters with questions and voting processes
- Maintained order at voting stations and ensured election compliance
- Performed balance counts to ensure the accuracy of votes and ballots

Buffet Attendant | Pinnacle Caterers

March - Oct. 2023

Toronto, ON

- Assisted the head chef with kitchen operations at a high-volume restaurant
- Processed customer orders and assured prompt, correct delivery
- Monitored food preparation and presentation in accordance with brand guidelines
- Maintained strict obedience to health, safety, and sanitation policies
- Contributed to a clean organized and efficient kitchen environment

COMPETITIONS

ParaHelper – AI Agent Hackathon | (WIMTACH x EffectiveAI)

March 2026

React | Node.js | Express | MongoDB | ChromaDB | OpenRouter (Claude Sonnet)

- Built the full-stack architecture for an AI-powered paramedic assistant that automates form completion through natural language and voice input.
- Developed the Node.js/Express backend with a multi-agent pipeline (8 agents) handling transcription correction, intent detection, data extraction, guardrail validation, and PDF export.
- Integrated OpenRouter (Claude Sonnet) and ChromaDB vector search for intelligent, context-aware responses across multi-turn conversations.
- Built the React frontend with real-time form panels, confidence scoring indicators, and voice-to-text support.

Vending Kitchen System – Design Hackathon | (WIMTACH x Cenith Energy Corp.) 🏆 1st Place

Feb. 2025

- Led a team to 1st place in a design challenge hosted by Centennial College and Cenith Energy Corp.
- Directed the conceptual design of an automated smart kitchen module (VKS) for schools, offices, and transit hubs covering subsystem integration, scan-to-cook workflow, hardware architecture, and a three-layer IoT dashboard UI.
